What triangle!

Greater than and less than

The croc will always open its mouth to the biggest fish

$12 < 18$

The mouth is open to the biggest number - 18 is greater than 12

\geq Greater than or equal to. Less than or equal to \leq

π

Pi

3.14159...

This symbol is Pi

Measure all around a circle (circumference)

Measure through the middle of the circle (diameter)

Circumference \div diameter = π

No matter how big or small a circle is Pi will always be 3.14159...

If the diameter of a circle is 10, you can times 10 by Pi to work out the circumference
 $C = 10 \times 3.14159$
 $C = 31.4159$
 Try it with any number!

This symbol means infinity

∞

Percentages and decimals

%

An item is on sale for 20% off. The price was \$80. How do you work out the sale price?

Easy!
 Just multiply the price (80) by the percentage (20) and divide by 100.

$80 \times 20 = 160$
 $160 \div 100 = 16$
 $\$80 - \$16 = \$64$

'cent' is the Latin word for 'hundred'

A percentage is a number broken up into 100 parts

Money uses decimals to show dollars and cents like this:

The decimal point moves by tens. You can work out 10% by moving the decimal point forward one spot.

10% of \$49.99

= \$4.99

Move the decimal point from here

= equal to
 \neq not equal to

A Fibonacci spiral is a mathematical pattern that is found in nature - from sea shells to ferns, all the way to galaxies in space, and even your ear!

Square - Cube

A number squared is a number times itself

A number cubed is a number times itself and then again

$1^2 = 1$ (1x1)
 $2^2 = 4$ (2x2)
 $3^2 = 9$ (3x3)
 $4^2 = 16$ (4x4)
 $5^2 = 25$ (5x5)
 $6^2 = 36$ (6x6)

These are square numbers

$1^3 = 1$ (1x1x1)
 $2^3 = 8$ (2x2x2)
 $3^3 = 27$ (3x3x3)
 $4^3 = 64$ (4x4x4)
 $5^3 = 125$ (5x5x5)
 $6^3 = 216$ (6x6x6)

These are cubed numbers

A square root is a number multiplied by itself to make a square number, so ...

$\sqrt{25} = 5$

The square root of 25 is 5!

This is the square root sign

This symbol means 'sum of'

Σ
